Quantity:	1
Weight:	56 g

Burns can happen at any time and can cause life-threatening situations. The H&H Sterile Burn Blanket provides a fast response to burns large and small.

This sterile, non-adherent, dry blanket can be used to treat thermal burns that cover a large percentage (over 20%) of body surface area.

The blanket's large, 84" X 56" size allows for a vast coverage area across arms, legs, and torso.

The material will allow for fluid and heat retention and meets TCCC November 2009 guidelines for the treatment of burns.

H&H vacuum seals our Sterile Burn Blanket to create a small, tight pack that can fit in any field or emergency kit.
