Rescue System  
Type: Sked Rescue System – PJ SKED® #SK215

### 13.2 Description

The rescue system, type: Sked Rescue System – PJ SKED® #SK215 (Figure 1), is designed for the transport of an immobile person. The rescue system consists of a rollable plastic shield, the Sked Stretcher, with dimensions of about 2.44m x 0.90m and two handholds at its long side. Additionally four tension belts are attached at the side which are to be used to form the stretcher and fastening the person. At the top and bottom further straps are attached as well as a handhold for pulling the stretcher. The rescue system also includes two rescue loops type: Head Strap and hand loops.
