Tariff:	39232990
Weight:	1,50kg

'Versatility,' 'Customization' and 'Modular' were the key focus points in the design of this pack. Tactical environments and operations are fluid; you need to be flexible and so does your gear. This is the next generation in medic packs. The CTOMS™ MED 2ndLine™ Main Pack is a low profile aid bag with a surprisingly large capacity thanks to the efficient organizational layout.

The slim profile of the pack allows the wearer to operate more effectively in confined spaces such as vehicles, aircraft and buildings.

The Main Pack is used to carry medical equipment. The internal layout of the pack is customizable with any variation in the use of the Book Folders, Quad Fold Pouches, MARS™ Panels or other accessories sold separately.
