

XTRACT®SR

LIGHTWEIGHT CASUALTY EXTRACTION

The Xtract®SR is a rescue litter designed for operators to quickly move the combat casualty from point of wounding to definitive medical care.

Unlike traditional stretchers, the Xtract®SR provides a padded fabric cocoon for the casualty to keep them warm, comfortable and accessible.

Casualties can then be lifted or pulled across challenging environments maximising patient care and operator safety.

***Xtract®SR is rated to 660lbs,
weighs only 7lbs, packs down to 9" x 22"
casualties can be loaded in as little as 30secs

XTRACT®SR

The Xtract®SR gives the operator a modular approach for the movement of a casualty from a hostile environment. This approach minimizes weight and cube and allows for operational flexibility.

ONE MISSION MANY OPTIONS

ENHANCED PATIENT CARE

Designed around the modern operational casualty. The Xtract®SR will simplify transportation and enhance patient care.

SOLUTION

Providing the operator with flexibility to select the most appropriate configuration.
