The Military SmartTriage™ Pack and Military SmartTriage™ Tri Pack are designed to be deployed by the first medical vehicles arriving on-scene and provide all the equipment needed to deliver the core tasks at level one of an incident. The Military SmartTriage™ Tri Pack also provides space to carry life-saving treatment equipment.

In use with multiple militaries worldwide, the TSG solutions have proven time and time again that correctly configured equipment, available where needed, provides a significant advantage to your organisation when tasked with successfully dealing with a multiple casualty event.
