

# PneumoDart

---

---

Item No:	BR-00052
Manufacturer:	Tytek Medical
Certificates:	CE
Size:	(14GA) x 8,2cm
Color:	N/A
Country of origin:	USA
NSN no:	6515 01 655 9514
Tariff:	90183190
Weight:	18g

The PneumoDart is a reliable solution for treating a tension pneumothorax injury, or sucking chest wound. Our robust innovation helps you to get it right, first time.

It offers efficiency, safety and important physical features. Typical methods for treating this kind of injury include the application of a plastic seal over the chest wound prior to inserting a needle catheter into the chest to drain air out of the chest and relieve pressure.

Our needle is 3.25" which is the optimal length as recommended by the Tactical Combat Casualty Care (TCCC).

Visible cap head to monitor air or blood leaving the chest. Luer lock cap allows for an active drawing or elimination of air or blood from the chest.
