The SWAT-Tourniquet™ is a unique and multipurpose dressing. Its name provides a description for usage Stretch, Wrap, and Tuck, but also the communities for whom it was developed - military and civilian Special Weapons and Tactics teams.

The SWAT-Tourniquet™ allows a more rapid means to control extremity bleeding, and allows application higher into the groin and axilla than other tourniquets. Its ease of application is one of its greatest benefits; individuals can effectively apply it in seconds with little to no prior training.

At a third of the cost and weight of other combat used tourniquets, this tourniquet should find its way forward with every tactical operator.
