

# Telespro Vacuum Mattress

Red/Black

---

---

Item No:	EE-0038
Manufacturer:	Telespro
Certificates:	CE
Cover Size:	90 x 210 cm
Color:	Red/Black
Country of origin:	Finland
NSN no:	N/A
Tariff:	30059099
Weight:	7 kg

The vacuum mattress supports and immobilizes the patient enabling safe transport in situations in which spine injury is suspected.

The Vacuum Mattress is light-weight and easy to use it has a unique structure composed of two layers, which makes it particularly durable: the fabric base outer layer protects the vacuum inner layer.

The Vacuum Mattress is still light and easy to use and the base has 14 strong fabric carrying handles attached to the sides of the base bag. This design evenly distributes the weight and pressure of the straps on the patient and vacuum mattress to facilitate lifting and carrying. Below the base is a separate channel for spineboards or scoop stretchers for support. With such add-ons, the Vacuum Mattress may be used as a stretcher.
