NSN no:	N/A
Tariff:	39232990
Weight:	111 g

CTOMS' low profile suspenders complement the M-Harness™ belt configuration system. The suspenders are designed to distribute the weight between your hips and shoulders as desired. The suspender is constructed to be static and able to move when you need to move, as the main adjustment is now within the suspender straps with tri-glide buckles.

Features Include:

8 Attachment points on the padding system. Flat sternum strap with G hook to prevent slippage off your shoulders. Flat stitched eliminating pressure points. Can be worn either over or under your plate carrier for your preferred comfort.
