Tariff:	39232990
Weight:	0.13 kg

CTOMs Gen III Suspenders are designed to distribute weight between your hips and shoulders to reduce strain, these static suspenders move when you move, allowing range of motion during a mission.

The essential chest strap that prevents the suspenders from falling off your shoulders is adjustable to different heights in order to accommodate different body sizes.

You can customize your suspenders to fit your body and comfort without compromising functionality.
