Abdominal Aortic & Junctional Tourniquet

Item No: CL-000265
 Manufacturer: Compression Works
 Certificates: CE
 Size: N/A
 Color: Black
 Country of origin: USA
 NSN no: 6515-01-616-4999
 Tariff: 90189084
 Weight: 663 g

The Abdominal Aortic & Junctional Tourniquet has several functions:

Abdominal Use: AAJT-S compresses the abdominal aorta when applied at the mid-abdomen to control bleeding in the pelvis, groin,

and legs.

Axilla: The AAJT-S compresses the subclavian artery to shut off the blood supply like a faucet.

Inguinal: The AAJT-S can be positioned to stop bleeding for left or right lower leg hemorrhages.

Pelvic Fractures: The AAJT-S is cleared to stabilize the pelvis and can reduce the size of the abdominal cavity that the patient can bleed into.
REBOA - Zone 3: The AAJT-S has been proven to be equivalent to Zone 3 REBOA* when applied at the mid-abdominal level.
