LESS® Emergency Stretcher Rolling Kit is a functional solution designed for fast deployment of stretchers to an emergency scene with multiple injured. The stretcher kit bag is equipped with both wheels and sliders. The mobility allows one rescue worker to, without difficulty, carry a stretcher kit to the scene, even in rough terrain.

LESS® Emergency Stretcher Rolling Kit also contains carrying harnesses and hypothermia prevention sets. The PRO edition further contain spider strap for stabilization of patient and Triage Pocket for initial triage.

The Trolley bag can be adapted to specific needs to hold stretchers only (up to 5 pcs.) or other equipment needed.
